## TECHNICAL

**polytec** HIGH PRESSURE laminates comprise of top-quality materials with excellent technical properties.

They consist of cellulose selected papers, impregnated with resin and produced under heat and high pressure.

Comprises of quality materials with excellent technical properties:

- scratch and wear resistant
- not adversely affected by moisture, burn marks and stains, nor suffer from colour instability
- smooth and non-porous surface, does not support the growth of bacteria or fungi
- good chemical resistant, can withstand all commonly used non-abrasive cleaning agents and aggressive disinfectants
- heat resistant, do not melt, drip or explode, retains their stability for a long time
- impact resistant

Compliant with European Standard EN 438-2.

Standard size: 1,360mm x 2,440mm

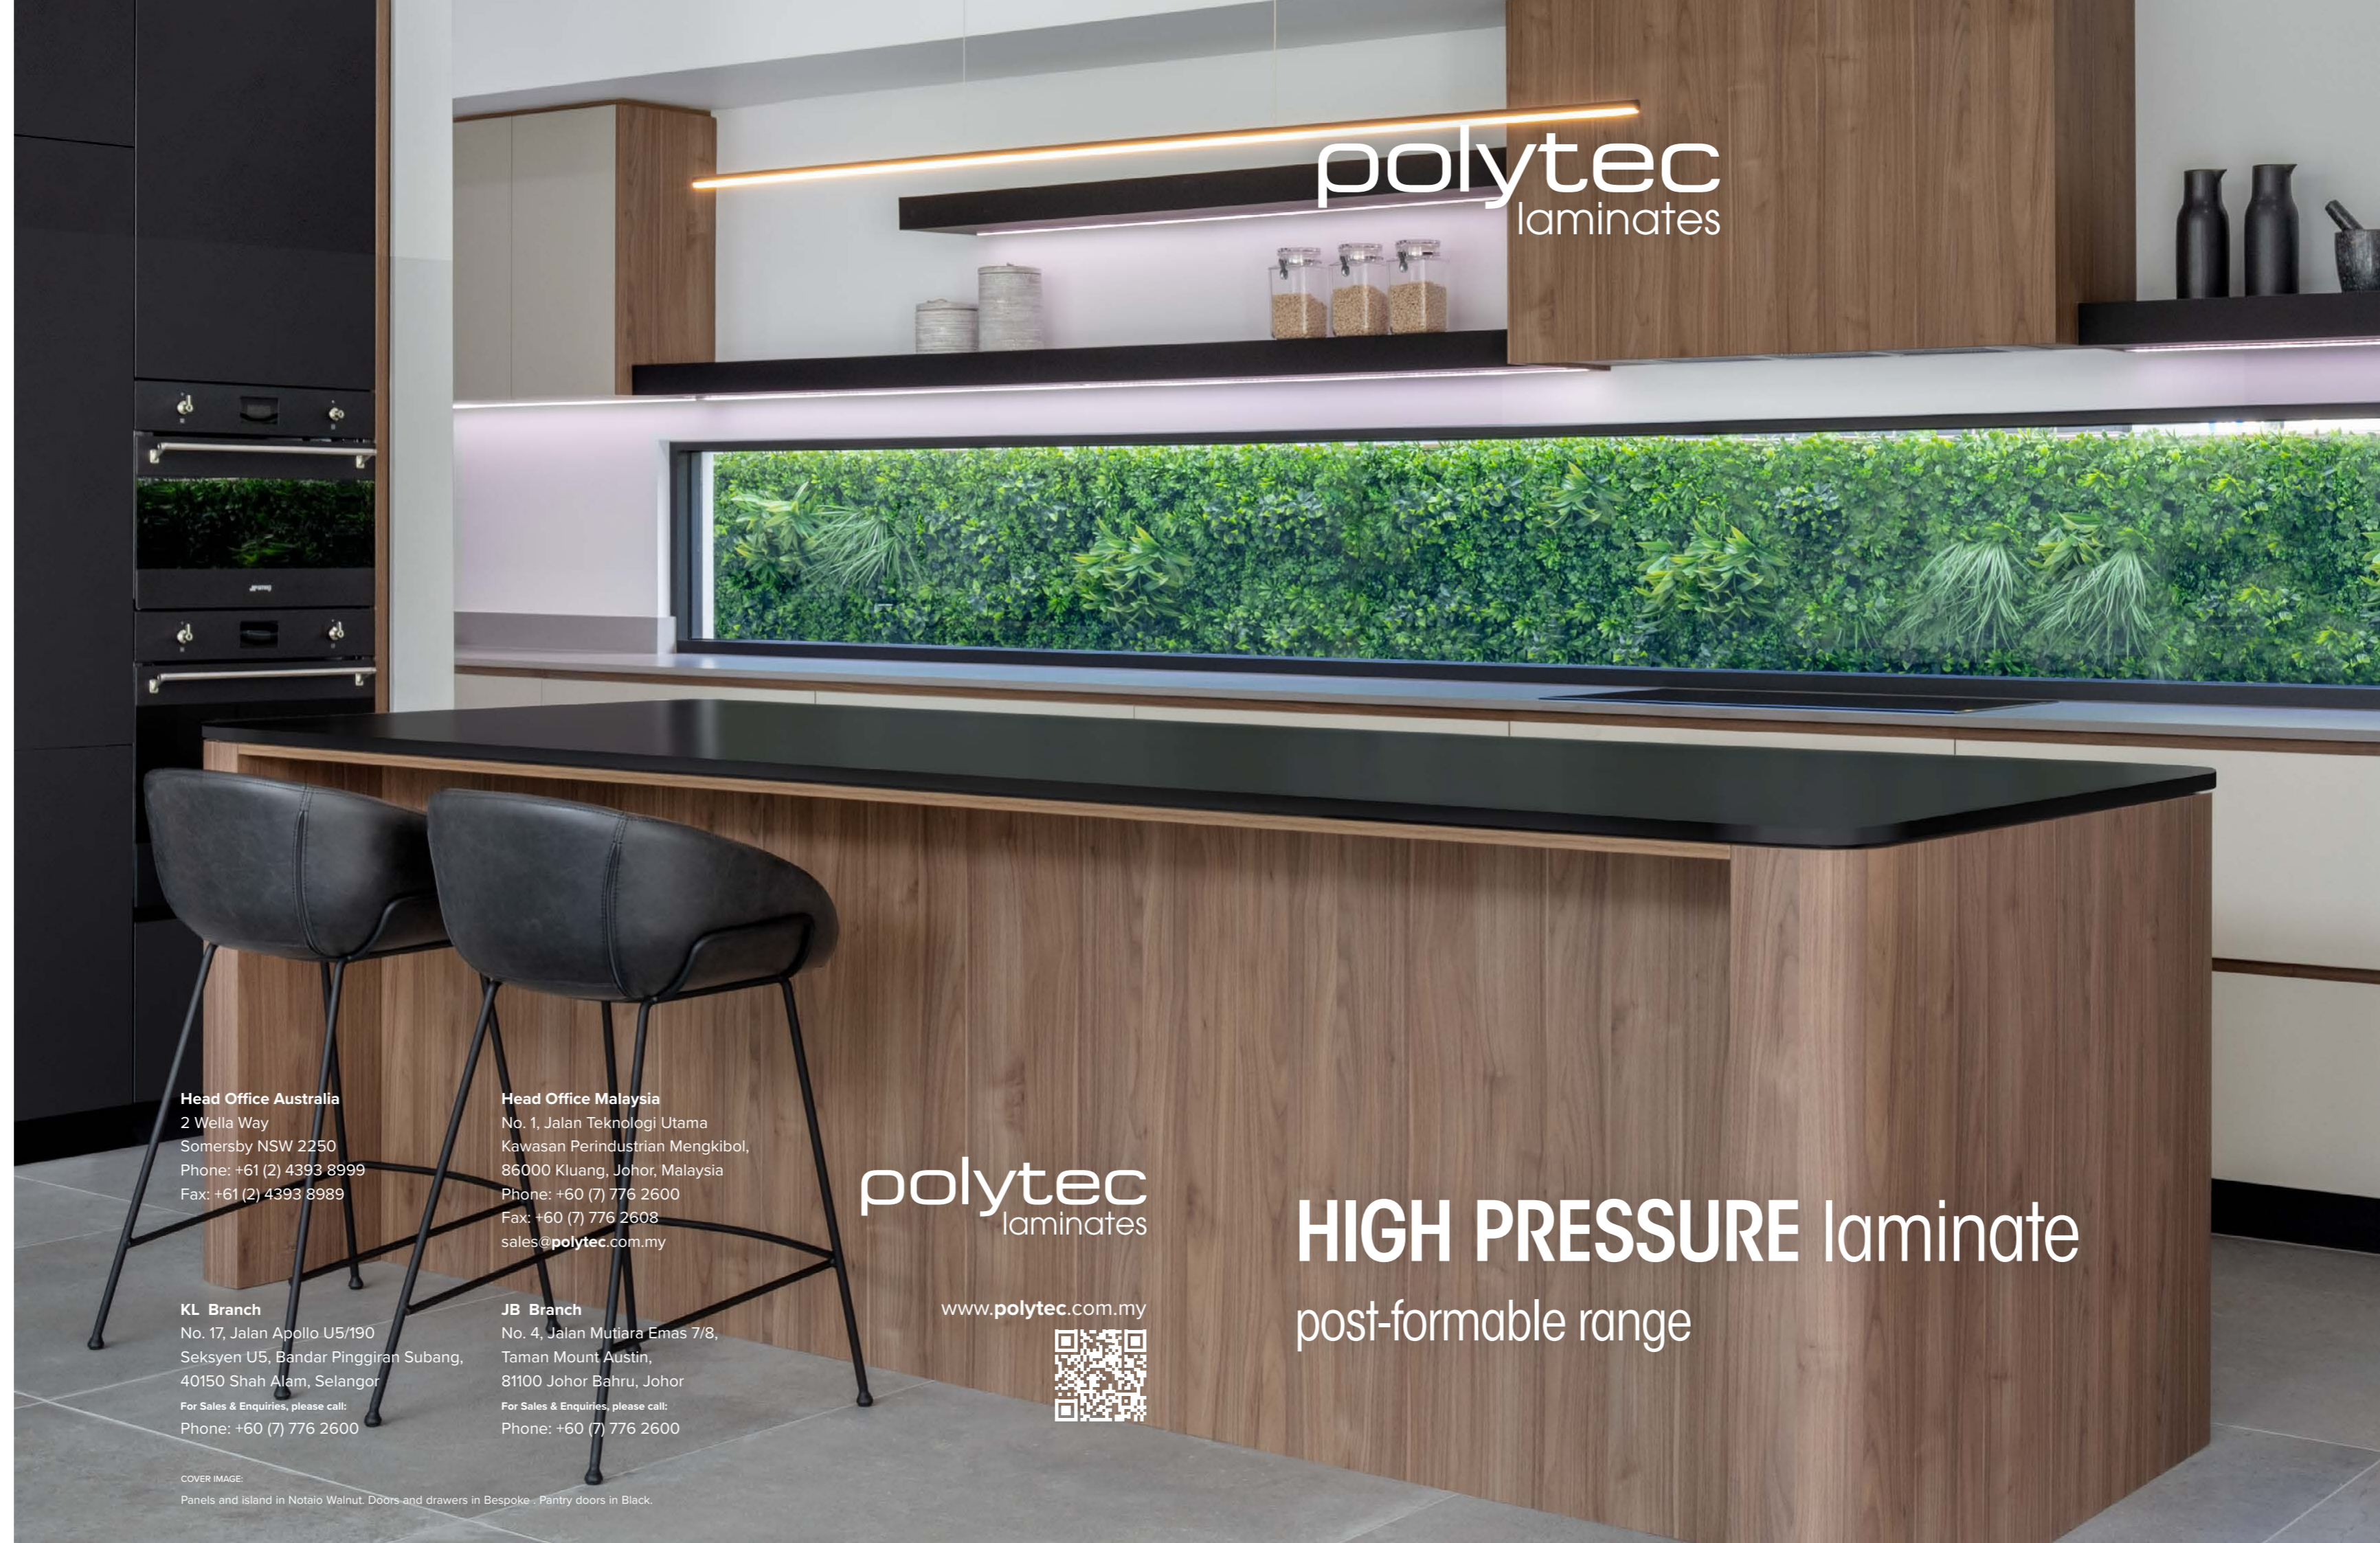

## IMPORTANT

Kindly inspect products prior to installation.

**polytec's** liability for any manufacturing defect will be limited to the extent of the cost of the product only.

Benchtop in Alicante Stone.  
Wall lining in White Cement.  
Drawers in Blossom White.  
Wall feature in Prime Oak.

# About

## POST-FORMABLE RANGE

**polytec** Laminates Post-formable range of High Pressure Laminates contain a durable surface finish, perfect for domestic and commercial joinery, wall cladding, benchtops, worktops & shelving.

## ABOUT US

**polytec** laminates invests in pioneering new product and range developments to create a palette that is contemporary and comprehensive. The **polytec** laminates' range comprises High Pressure Laminates (HPL), Continuous Laminates and Compact Laminates. These products are manufactured with the most technologically advanced and computer integrated manufacturing systems. A committed, skilled and passionate workforce delivers excellence in craftsmanship and customer service on all platforms in producing materials that meld attention to detail, beautiful finishes and durability.

The company is proudly owned by Australian private business, Borg, deploying the latest in world-class technology and at the forefront of innovation. Borg has grown to be Australia's leading manufacturer of decorative surfaces, employing over 2000 people.

**polytec** laminates proudly boast a collection of locally made and globally curated materials for horizontal and vertical surfaces, providing the option of applying a consistent design appearance throughout a project, inserting highlight elements, or selecting materials that are designed to unite & compliment.

Vanity, doors, panels and shelving in Coastal Oak.

## PROFILES

## CLEANING

Laminates should be cleaned as follows:

Using a mild household spray wipe down the laminate with a soft cloth taking care not to rub too hard. Dry using a soft cloth so as not to leave any solvent on the laminate.

You may also use Methylated Spirit on a soft cloth, using a circular cleaning motion. Thoroughly clean over the wider area with water and detergent on a damp cloth afterwards to remove any residual Methylated Spirit.

Always ensure that you refer to the recommendations provided by the cleaning product manufacturer before use.

## CARE

To maintain and uphold the longevity and aesthetic appeal of the surface, please adhere to the following care guidelines:

**DO NOT** use any of the following on laminate: Commercial Cleaning Products, Abrasive Cleaners, Scouring Pads or Abrasive Papers, Solvents, Thinners, Turpentine (Turps), Ammonia, Bleach, Acetone, M.E.K. and any other cleaning agents containing Organic Solvents or the above mentioned products.

**DO NOT** use sharp objects such as knives on the laminate surface.

**DO NOT** place hot cookware directly on the laminate.

**DO NOT** flood the laminate at the joints which may cause the substrate to expand.

## NOTE

Dark coloured surfaces will show fingerprints and require more care and maintenance than lighter coloured surfaces. It is recommended to test a product sample prior to colour selection. **polytec** swatches and samples represent a small area of the overall colour structure. To view the large colour sample, visit [www.polytec.com.my](http://www.polytec.com.my).

The colours and details shown in this brochure are to the highest standards in printing. However, they should only be used as an indication of actual product colour. To order your free colour sample visit [www.polytec.com.my](http://www.polytec.com.my).

The use of our current samples gives the colour and finish that a customer would expect to receive. Samples are provided for colour and finish selection and **polytec** recommend testing a sample for fingerprint resistance and ease of cleaning. **polytec** does not guarantee exact colour matches across product ranges due to colour variation in each product group.
