polytec laminates invests in pioneering new product and range developments to create a palette that is contemporary and comprehensive. The **polytec laminates'** range comprises High Pressure Laminates (HPL), Continuous Laminates and Compact Laminates. These products are manufactured with the most technologically advanced and computer integrated manufacturing systems. A committed, skilled and passionate workforce delivers excellence in craftsmanship and customer service on all platforms in producing materials that meld attention to detail, beautiful finishes and durability.

The company is proudly owned by Australian private business, Borg, deploying the latest in world-class technology and at the forefront of innovation. Borg has grown to be Australia's leading manufacturer of decorative surfaces, employing over 2000 people.

polytec laminates proudly boast a collection of locally made and globally curated materials for horizontal and vertical surfaces, providing the option of applying a consistent design appearance throughout a project, inserting highlight elements, or selecting materials that are designed to unite & compliment.

WOOD

ravine

Wood grains embossed with raw linear texture and underscored by warm and inviting shades

ingrain

A subtle woodgrain embossing with an overall matt finish

vantage

Consisting of exciting contemporary grains, textured and tactile, that enhances the natural beauty of timberprint

natura

A sophisticated marketplace innovation that combines the natural and softness of woodgrains

dry

A medium textured surface with low reflectivity and an even all over stipple

texture

A fine textured surface with low reflectivity

gloss

A high gloss surface similar to polished painted surfaces

bright oak

Purity, depth and clarity of colour achieved while maintaining the timber appearance

Technical

polytec HIGH PRESSURE laminates comprise of top-quality materials with excellent technical properties.

They consist of cellulose selected papers, impregnated with resin and produced under heat and high pressure.

- Comprises of quality materials with excellent technical properties:
- scratch and wear resistant
 - not adversely affected by moisture, burn marks and stains, nor suffer from colour instability
 - smooth and non-porous surface, does not support the growth of bacteria or fungi
 - good chemical resistant, can withstand all commonly used non-abrasive cleaning agents and aggressive disinfectants
 - heat resistant, do not melt, drip or explode, retains their stability for a long time
 - impact resistant

Meets the requirements of European Standard EN 438-2.

Standard size: 1,220mm x 2,440mm
Please contact our sales representatives for different sizes.

Certification

Certification No. MyHP00037/17-B001

Biofibre Composite
SIRIM CRITERIA 005:2010
Certification No. EL000074

Certification No. 042-033-2065
Environmentally Improved Low Emission Low Toxicity

polytec is committed to environmental awareness and preservation. Choose **polytec** and make a difference.

Maintenance

To ensure that your Warranty will not be void, DO NOT use any of the following on laminate:

Commercial Cleaning Products, Abrasive Cleaners, Scouring Pads or Abrasive Papers, Solvents, Thinners, Turpentine (Turps), Ammonia, Bleach, Acetone, M.E.K. and any other cleaning agents containing Organic Solvents or the above mentioned products.

DO NOT use sharp objects such as knives on the laminate surface.

DO NOT place hot cookware directly on the laminate.

DO NOT flood the laminate at the joints which may cause the substrate to expand.

Cleaning

Laminates should be cleaned as follows:

Using a mild household spray wipe down the laminate with a soft cloth taking care not to rub too hard. Dry using a soft cloth so as not to leave any solvent on the laminate.

You may also use Methylated Spirit on a soft cloth, using a circular cleaning motion. Thoroughly clean over the wider area with water and detergent on a damp cloth afterwards to remove any residual Methylated Spirit.

Always ensure that you refer to the recommendations provided by the cleaning product manufacturer before use.

Disclaimer

Kindly inspect products prior to installation. **polytec's** liability for any possible manufacturing defect will be limited to the extent of the cost of the product only.

Postforming High Pressure Laminate

polytec Laminates Postforming High Pressure and Continuous Laminates contain a durable surface finish, perfect for domestic and commercial joinery, wall cladding, benchtops, worktops & shelving. The continuous press allows for large projects, available in a variety of sizes, thickness and surface finishes.

Chemical Resistance High Pressure Laminate

polytec Laminates Chemical Resistant laminate range is a specialist material that meets the functionality and efficiency required for specific areas such as industrial, agribusiness, healthcare, education and laboratories. The Chemical Resistant laminate surface is suitable for high-traffic commercial areas.

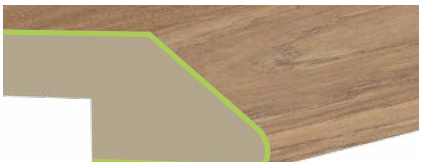

Compact Laminate

polytec Laminates Compact Laminate range boasts excellent technical and antibacterial properties with a durable, hard-wearing surface finish. Being impervious to water, Compact Laminate can be used as partitioning, lockers, table tops, wall cladding and furniture applications.
